

Q2 2030

**Revenue

The quarter, in short

Q2 closed at **\$4.2M revenue, up 18% on Q1** — our strongest quarter since launch, carried almost entirely by subscriptions.

Growth came from expansion, not acquisition: existing customers upgraded faster than new ones signed. Services held flat, and marketplace remains small but is compounding quickest of the three lines.

The watch item is concentration — our top ten accounts now represent 34% of revenue, up from 28% last quarter.

“Expansion did the work this quarter. Q3 has to prove we can still land new logos.”

Q3 priorities

- ☐ **Rebalance pipeline toward new logos** — target 40% of Q3 bookings.
- ☐ **Ship usage-based pricing tier** — unlocks the mid-market segment.
- ☒ **Close annual-billing migration**
